SUBJECT: I-Touch Manager firmware upgrades for remote maintenance via 3G and database improvement

Dear Madam
Dear Sir,

We would like to announce you the upgrade of the I-Touch Manager firmware for remote maintenance via 3G and database improvement.

1. Remote maintenance function

Thanks to the new remote maintenance function, the I-Touch Manager can be accessed with the web browser from a remote place through internet by using 3G wireless modem.

The remote maintenance function is supported on the ITM new firmware version 1.04.04 compatible with the following 3G wireless modem:

- Manufacturer: ZTE
- Model: MF112

2. Database improvement

With the new firmware version 1.04.00, the data storage capacity of the ITM has improved. Consequently, the specifications for the history records and the Energy Navigator option has drastically increased compared to the current firmware version 1.02.00.

		Current firmware version (1.02.00)	New firmware version (1.04.00)
History	Number of records	100.000	500.000
Energy Navigator (data storage size)	Yearly Graph	2 years	2 years
	Monthly Graph	2 months	13 months
	Waste Check	15 days	13 months
	Hourly Data Output	15 days	13 months

Together with the ITM firmware upgrade, the related firmware and software have been also upgraded to below new versions:

Firmware/software	New firmware versions	Details
iTMIntegrator	1.04.00G	Firmware for iTM integrator
PresetLauncher	1.04.00	Software for off-site project and floor plan preparation
iTM_Demo	1.04.00D	Demo software for iTM installation
iTM_PCDemo	1.04.00D	Demo software for PC installation

If the energy navigation option is activated on the ITM, the data of the energy navigation must be exported before the firmware upgrade. The stored energy navigator data on the ITM will be erased if the firmware is upgraded.

3.Availability

3.1.Firmware and software

Firmware/software	New firmware versions
ITM	1.04.00
iTMIntegrator	1.04.00G
PresetLauncher	1.04.00
iTM_Demo	1.04.00D
iTM_PCDemo	1.04.00D
Remote maintenance function	1.04.04

The new firmware & software are available for download on the extranet:

Extranet → Software Downloads → Service Software → Network Solutions → ITM

The new firmware versions 1.04.00 and 1.04.00G will be respectively standard on the ITM and ITM integrator produced from April 2013.

The version 1.04.04 supporting the remote maintenance function is not standard on the ITM and needs to be downloaded from the extranet.

3.2. Wireless 3G modem
